

Implementing Emergent Curriculum

Emergent Curriculum is an approach that allows young children's interests to take the lead! In this training, participants will learn about how teachers can implement emergent curriculum. This training will cover: the role of the adult, child, and environment; the importance of play-based learning; how assessment works in an emergent curriculum; and creating plans. This is a two-part training, with an independent assignment to complete between sessions.

Jan 28th & Feb 4th, 2025
from 6:00pm - 8:00pm

Virtual - Zoom

5 STARS Hours
